

NECROS X Cybersecurity Incident Report

Total Attacks Detected: 43

Critical Attacks: 11

Most Targeted API: admin_api

Most Suspicious IP: 99.23.11.45

AI SOC Incident Summary

SOC ANALYST REPORT

Total Attacks Detected:
43

Critical Threats:
11

High Severity Threats:
12

Targeted APIs:
login_api, upi_transfer_api, legacy_transfer_api, old_payment_gateway, internal_audit_api, admin_api, payment_api

Threat Assessment:
Attackers are actively probing sensitive APIs.
Patterns indicate coordinated intrusion attempts.

Recommended SOC Actions:

- Enable stricter API authentication
- Monitor zombie APIs closely
- Increase honeypot deployment
- Activate defensive response escalation
